

### Green Campus Policy

JPM Arts and Science College is obliged to promote all of its activities towards the achievement of developing, maintaining and improving a green campus. The following are the different areas in the policy to maintain the natural diversity.

1. The college should protect the environment through the prevention of pollution and waste accumulation in the campus.
2. The college should formulate its policies complying with all relevant environmental legislation, standards, agreements, policies and procedures demarcated by the central, state governments.
3. The college is committed to maximize sustainable resource use and minimize the use of hazardous substances.
4. Special measures should be taken to protect and improve biodiversity of the campus.
5. The college should design programmes to foster the quality of the environment and protection of the biodiversity throughout the region.
6. Objectives and targets should be established for improving our environmental performance in the areas of: energy consumption, water consumption, waste to landfill, sustainable transport, and biodiversity.
7. The campus has to be made plastic free to a possible extent. Abiding by the principle of green protocol, the institution insists on the use of cloth items replacing plastic made ones.
8. Reservoirs for rain water harvesting should be constructed in the campus.
9. The college should take steps to harness solar power.
10. The college should attempt to become a paper free one by promoting electronic platforms for academic and administrative purposes.
